This Office action is in response to Applicants' remarks received April 23, 2007. Upon review of Applicants' amendments, it appears that a second restriction requirement is required.

Claims 114-131 are canceled. Claims 132-170 are pending.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 132-146, drawn to an isolated polypeptide having a chaperone-like activity and having a sequence at least 60% homologous to SEQ ID NOS: 2, 35 or encoded by a polynucleotide having a sequence at least 60% identical to SEQ ID NOS: 1, 5, 6, 34, 39, 40.

Group II, claim(s) 147-170, drawn to an isolated denaturant stable and/or protease resistant protein having chaperone-like activity/HRP protection activity, and a method of isolating.

Additionally, Group I is subject to further restriction. Applicant is required to further elect a specific SEQ ID NO. This is NOT an election of species. Nucleotide sequences encoding different proteins and/or polypeptide sequences are structurally distinct chemical compounds that are unrelated to each other. These sequences are thus deemed to normally constitute independent and distinct invention within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide and/or polypeptide sequence is presumed to represent an independent and distinct invention, subject to restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141. It is noted that searching more than one of the claimed patentably distinct sequences represents a serious burden for the Office.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons:

(1) the special technical feature of Group I is the polynucleotide sequence that encodes a polypeptide having a chaperone-like activity; (2) the special technical feature of Group II is the structure and function of a denaturant stable/protease resistant protein. As each Group requires a special technical feature not shared with the other, they lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marsha M. Tsay whose telephone number is 571-272-2938. The examiner can normally be reached on M-F, 9:00am-5:00pm.
